

## Resolution Re: Economic Integration and Housing in Burlington

The Burlington Board of School Commissioners believes that the Burlington Public Schools are an integral part of our community. The schools represent the commitment that city residents have for education. Each elementary school reflects its neighborhood mixture of population.

In order to provide more varied perspectives for its students, the Burlington School System embraces its diversity. However, not every school provides the same level of diversity. We believe housing affordability is a major obstacle to integration of families of various levels of economic means.

We, therefore, the members of the Burlington Board of School Commissioners resolve that the Burlington City Council set as a housing priority, the development of housing such as to integrate families of various economic means in the various neighborhoods of the city.
